Goulds Pumps

Goulds 3175

Paper Stock/Process Pumps with
i-ALERT™ Patented Intelligent Monitoring

Engineered for life

Wide Range of Materials

Stocked in Cast Iron and 316 Stainless Steel. Available in any machinable alloy including 317SS, 317LSS, 316LSS, Alloy 20, CD4MCu, 904L, 254SMO®, Titanium, Hastelloy B&C.

Goulds Model 3175

Designed to Handle the Toughest Jobs in the Pulp & Paper and Process Industries

- ◆ Capacities to 28,000 GPM (6360 m³/h)
- ◆ Heads to 350 feet (107 m)
- ◆ Temperatures to 450°F (232° C)
- ◆ Pressures to 285 PSIG (1965 kPa)

Design Features

- ◆ Back Pull-Out
- ◆ Fully Open Impeller
- ◆ External Impeller Adjustment
- ◆ Renewable Wear Parts
- ◆ Maximum Sealing Flexibility
- ◆ Heavy Duty Construction
- ◆ Maximum Parts Interchangeability
- ◆ *i-ALERT*™ Condition Monitoring

Services

- ◆ **Pulp & Paper** - Paper Stock through 6% Consistency, Black Liquor, Hydropulper and Broke Service, Low NPSH Digester Circulation, Blow Tank to Screens, Primary Screens Rejects, High Density Chlorine Tower to Washer, Flotation Cell Circulation
- ◆ **Chemical** - Evaporator and Reboiler Circulation, Slurry Services
- ◆ **Petroleum** - Corrosive/Abrasive Crude, Catalyst Slurry, Coke Fines
- ◆ **Steel** - Mill Descaling, Waste Treatment, Venturi Scrubber, Electro-Galvanizing Recirculation
- ◆ **Food** - Fruit Pulp, Grain Mash and Spent Grains, Evaporator Recirculation, Beet and Cane Sugar, Corn Products
- ◆ **General** - Waste Treatment, Air Pollution Abatement, Acid Mine Water, Textile Slurries

Maximum Sealing Flexibility

Patented* Dynamic seal For elimination of mechanical seal problems; reduced maintenance

Goulds *Dynamic Seal* pumps are designed to handle the tough applications where conventional mechanical seals or packing require outside flush and constant, costly attention. The major advantage is that through Goulds patented design (No. 5,344,163) external seal water is not required, thus eliminating leakage, pumpage contamination, product dilution and problems associated with piping from a remote source.

*U.S. Patent No. 5,344,163

Standard Model 3175 pumps can be fitted with a repeller between the stuffing box and impeller. At startup, the repeller functions like an impeller and pumps liquid from the stuffing box. When the pump is shut down, a conventional static seal prevents pumpage from leaking.

The 3175 is easily field converted to Dynamic Seal. Goulds retrofit kit includes repeller, stuffing box cover, repeller plate, shaft sleeve and choice of static sealing arrangement.

Patented* TaperBore™ Seal Chamber

Goulds optional TaperBore™ seal chamber features an enlarged bore for improved lubrication and cooling of the mechanical seal. The patented design (No. 5,336,048) features a tapered throat and a vane particle ejector to keep solids away from seal faces and from building up in the seal chamber. Seal life is remarkably extended.

Goulds TaperBore™ seal chamber and cartridge mechanical seal. A full range of other seal types is available.

*U.S. Patent No. 5,336,048

Long Life/Low Maintenance/Reliable Operation

External Impeller Adjustment

Impeller clearance can be easily reset by external adjustment to maintain hydraulic performance. Delivers long time energy savings, while downtime is kept to a minimum.

Renewable Wear Parts

Low maintenance costs because all wear parts...suction sideplate, impeller, stuffing box cover, shaft sleeve and throat bushing...are easily replaced.

Heavy Duty Shaft

Designed for continuous service under most severe operating conditions—dry end broke, repulper, hydropulper, blowtank. Low deflection at maximum load for long seal and bearing life, extended MTBF.

Fully Open Impeller

Special warped vane, heavy duty open type for paper stock handling. Back pump-out vanes reduce stuffing box pressure, and help prevent solids from entering sealing chamber.

Optional TaperBore™ Seal Chamber

Features an enlarged bore for improved lubrication and cooling of the mechanical seal. The tapered throat keeps solids away from seal faces and from building up in the chamber. Seal life is remarkably extended.

Patented *i-ALERT*™ Condition Monitor

The *i-ALERT* Condition monitor reduces downtime by detecting improper operation before catastrophic failure occurs.

Standard Labyrinth Oil Seals

Prevent contamination of lubricant for extended bearing life.

Hydraulic Coverage 60 Hz

Sectional View Model 3175

Dynamic Seal Option

TaperBore™ Seal Chamber and Mechanical Seal Option

Optional High Efficiency Finned Cooler

Optional Suction Piece

Model 3175 Paper Stock/Process Pumps

Heavy Duty Design Features for Handling the Toughest Services with *i-ALERT*™ Patented Intelligent Monitoring

PATENTED *i-ALERT* CONDITION MONITOR

Constantly measures vibration and temperature at the thrust bearing. Colored LED's indicate general pump health. Provides early warning of improper operation before catastrophic failure occurs.

LABYRINTH SEALS

Standard Labyrinth Oil Seals prevent premature bearing failure caused by lubricant contamination and loss of lubricant.

HEAVY DUTY SHAFT

Designed for minimum deflection at maximum load. Dry shaft design—sealed by O-rings at sleeve/impeller hub and impeller bolt.

CONTINUOUS HIGH PERFORMANCE

Original high efficiency maintained by simple external impeller adjustment resulting in long-term energy savings.

OPTIONAL HIGH EFFICIENCY FINNED COOLER

Requires minimum cooling water; easily cleaned to maintain bearing cooling efficiency. Corrosion resistant materials standard.

RENEWABLE SHAFT SLEEVE

Hook-type sleeve is positively driven by impeller key. Free to expand with temperature changes.

LUBRICATION FLEXIBILITY

Oil lubrication standard. Grease and oil mist optional.

VERTICAL CENTERLINE DISCHARGE

Self-venting design for air handling. Casing provides maximum piping support.

RENEWABLE SIDEPLATE

Heavy suction sideplate minimizes maintenance costs. Positively sealed with O-ring and gasket.

FULLY OPEN IMPELLER

Designed for full range of services. Back pump-out vanes minimize stuffing box pressure, help prevent solids from entering seal chamber.

REPLACEABLE STUFFING BOX BUSHING

Minimizes packing and sleeve maintenance.

DUAL VOLUTE CASING

Provided on sizes as required to minimize radial unbalance for long packing, mechanical seal and bearing life.

EXTRA THICK WALL SECTIONS

For extended wear life and reduced maintenance.

Modular Interchangeability Minimum Parts Requirements

Dimensions Model 3175 All dimensions in inches and (mm). Not to be used for construction.

World Class Service Value-Added Capabilities

Goulds is much more than a manufacturer and marketer of pumps. Capabilities that extend from project consultation to on-site testing and start-up evaluation are available to

every customer. Many specialized services from Goulds are only evident after the sale and installation of the product: parts, repair, training and more.

Research and Development
Goulds continually tests and evaluates every product. The R&D team constantly seeks innovative designs, new materials and system improvements.

Fabrication and Casting
The most advanced foundry and fabrication concepts are utilized to improve quality. Our own advanced foundries produce metals from cast iron to Hastelloy including the new generation of high alloys. Because we're not dependent on outside suppliers, we have total control over metallurgical quality.

Repair and Overhaul
Goulds PRO (Pump Repair and Overhaul) Shops repair all types of rotating equipment. Each facility also has special diagnostic equipment to facilitate preventive maintenance. Let the nearest PRO Service Center demonstrate repair as an economical alternative to replacement.

Field Service

A staff of highly specialized installation, training and commissioning engineers is available to insure each projects' successful completion and start-up.

Training

Goulds offers the most advanced training program of its kind in the industry including product training, maintenance schools, and PRIME™ seminars. Each seminar is structured as an ongoing educational experience for customers around the world.

Parts Availability

Goulds Distribution Centers are strategically located worldwide, and are committed to the ready availability of repair parts.

Service and Support

In addition to direct sales offices around the world, over 200 authorized Goulds representatives and distributors are totally committed to meeting customers' requirements.

Goulds Model 3175: Easily A Proven Performer

Since its introduction in 1968, the 3175 has proved itself over and over again. Thousands of installations attest to its remarkable performance even under the severest conditions. And for ease of maintenance, it can't be beat. Customers know they can rely on the 3175 for minimum downtime, increased productivity.

Model 3175 handling paper stock in a paper mill.

Black liquor circulation pump (3175 XL) on spring-loaded baseplate.

A 3175 installed in a major chemical plant.

Taking suction from a large stock tank... the 3175 is the preferred pump in the Pulp & Paper Industry.

3175's on process service such as multi-effect evaporators.

Preventive maintenance is fast and easy on a 3175.

Top: A Model 3180 installed in a North American recycle mill.

Middle: Model 3180XL on difficult high temperature service. Spring-mounted baseplate provided to compensate for thermal expansion.

Goulds 3180/85

Worldwide Experience on Process Pumping Services

When Goulds developed the 3180, we utilized 140 years of pump design experience to ensure it would have unmatched mechanical reliability. Today, installations around the world attest to its remarkable performance. The 3180 is the heavy duty process pump designed to handle all of your tough process pumping applications.

World-class Pump Line

Model 3180 is built to ANSI standards.

- ◆ ANSI class 125/150 lb. flange drilling
- ◆ Inch-dimensioned O.D. of mechanical seal sleeve
- ◆ Inch-dimensioned bearing locknut
- ◆ Inch-dimensioned shaft and keyway at coupling

Model 3185 (built to Metric standards)

- ◆ ISO or JIS 16 bar flange drilling
- ◆ mm-dimensioned O.D. of mechanical seal sleeve
- ◆ mm-dimensioned bearing locknut
- ◆ mm-dimensioned shaft and keyway at coupling
- ◆ International design 3185 pumps comply to ISO 5199 with eight sizes conforming to ISO 2858 dimensions. Metric fasteners and fittings used throughout.

Model 3181/86

For high pressure/temperature services

- ◆ Centerline mounted
- ◆ Same hydraulics as 3180/85
- ◆ Power End components are interchangeable with 3180/85

World-class Paper Stock and Medium Consistency Products

Goulds offers a variety of products in various configurations to meet your medium consistency pumping and mixing needs

Standpipe Arrangement with ClO₂ Mixing

Stock from washers and mixers feed special Goulds standpipes that are reverse tapered to prevent stock bridging. Systems include controls for vacuum, dilution, level and flow, ClO₂ Optimix™ mixer and chemical injection pipe are included.

Tower Bottom Arrangement

Stock from bleach / storage towers falls into Goulds feed chute connected to the tower with expansion joint and isolation valve. Depending on tower level and consistency a vacuum pump may not be required.

Booster Arrangement

Goulds booster pump will increase pressure, but does not require standpipe or degassing system.

Pick Your Perfect Process Pump

No one in the industry offers the broad range of process pumps that Goulds does!

Whether it's for pumping severe corrosives, abrasive slurries, fibrous/stringy solids, high temperature liquids, hazardous fluids, low flow or high capacity services – Goulds has a perfect, reliable solution. The Goulds selection of pump solutions includes horizontal and vertical configurations in a range of alloy and non-metallic constructions, sealed and sealless.

The Pulp and Paper Industry has the widest range of applications of any industry. Goulds wide range of products ensures that we have the right pump for virtually every application.
